

Figure 2-5
Mile 104 Tipton Arroyo

On the eastern shore, opposite a point bar, is the mouth of Tipton Arroyo. The mouth of the arroyo has been excavated to remove the “fan” of sediments entering the river. The watershed draining to Tipton Arroyo (identified as Misc.2 by USCOE) encompasses 2.2 square miles with numerous drainage channels leading from uplands to the east. The channels flow under U.S. Interstate 25 and combine into Tipton Arroyo near the Rio Grande.

Integrated USIBWC Land Management Alternative

<i>Point Project Measures</i>	ID	#	Area (ac)
Native Vegetation Planting/enhancement	104A	1	2.52
Bank shave downs*	104B	1	3.4

Targeted River Restoration Alternative

<i>Point Project Measures</i>	ID	#	Area (ac)
Planting/enhancement	104A	1	2.52
Modify dredging at arroyos by creating embayments	104C	1	0.2

* Bank shave downs acreage is included in the Targeted River Restoration Alternative as a linear measure “Seasonal peak flows”.
